PROJECTS

FOOD ORDERING WEBSITE

A simple Food Ordering Website for a particular Restaurant owner in that users can select their preferred food/cuisine. It offers several sorts of foods on one website, allowing customers or users to choose according to their choices to order the food at any time, anywhere.

● **PHP ● HTML ● CSS ● Javascript ● Xampp Server ● MySQL**

DISEASES PREDICTION AND HOSPITAL RECOMMENDER USING MACHINE LEARNING

A disease prediction system based on a machine learning algorithm in which the user enters symptoms and receives disease and hospital lists based on the symptoms. Users can save time and energy by getting hospital lists from nearby locations.

● **Django ● Python ● HTML ● CSS ● Javascript ● SqLite**
● **Bootstrap ● Jupyter Notebook**

DESIGN FOR CAFE WEBSITE - CANVA

A simple design using figma software for cafe app. Applying some basic components, designs, logos and prototypes to it to make it attractive to the users.

● **Canva**
